

Fundamentals of Boiler Maintenance

Educational Workshop

Risk Solutions

The specialists at Hartford Steam Boiler understand your equipment. Decades of experience have given us extensive knowledge of most types of equipment, including what can go wrong, and how to make it run longer and better. Our educational workshops are designed to share that information with our customers to help them improve the operation and maintenance of their key equipment.

Overview

This workshop is designed for facilities with steam and/or hot water heating boilers. It provides a basic understanding of the fundamental principles of proper boiler operation and maintenance.

Agenda

- Types of boilers and descriptions
- Common causes of failure
- How to prevent failure through proper construction and operating practices
- Boiler and Pressure Vessel Code
- Controls and Safety Devices Code
- National Board Inspection Code
- Jurisdictional Rules
- Proper operation
- Boiler logs
- Controls and safety devices
- General Maintenance
- Boiler room safety
- Housekeeping

For experienced personnel this will serve as a review of the basic practices essential to proper boiler operation and maintenance. For those new to this field the workshop offers a foundation.
